### **Abstract:**

Use of mother tinctures are known to arrest the progress of the disease and offer instant cure and in some instances offer prompt relief where chronic miasmas have their root deep in the cells. In such cases relief should be given and then attempt should be made for radical cure by application of the most similar drugs of high potency. Knowledge of use and benefits of mother tincture is not sufficient enough to be applied in clinical practice but one must also know proper dose, repetition and the adverse effect of different mother tincture.

**Keyword :** Mother tincture, Pharmacy, Homoeopathy, beneficial effect, side effects.
